BOXFIX M – The ergonomic tool

BOXFIX M for Easier TANDEMBOX assembly

An ergonomic work centre, easy handling and effective setup make the BOXFIX M a very practical tool. BOXFIX M does away with the complicated assembly of drawer parts on the workbench. You can now assemble TANDEMBOX from an upright position with ease and precision. Easy set-up times and pre-set stops save time and more importantly improve assembly quality.

BOXFIX M can be used for all TANDEMBOX variations and assembly for cabinet widths from 270 to 1200mm all back heights up to a max. of 350mm is possible.

Precision technology increases efficiency

Using BOXFIX M, you can assemble drawers without complicated clamping. Back widths and heights can be pre-defined using stops. Drawer sides and bases are assembled quickly and precisely. Training time is minimised thanks to the logical sequence of work steps.

i BOXFIX M

First adjust the BOXFIX M for the right drawer width

The wooden back is attached to the back fixing bracket.

Base, drawer sides and back are then inserted and secured.

Finally, the drawer parts are fixed using screws.

MINIPRESS M - The compact, practical tool

MINIPRESS M - The compact, practical tool

Blum's drilling and insertion machines are designed for the assembly of Blum products. They enable precision drilling and insertion of fittings. Setup and operation is simple and easy.

Blum's MINIPRESS M is a robust tool for use on site or in the workshop. This machine requires neither compressed air nor a strong power supply. The machine can be operated from a regular room outlet (230V).

It is especially well suited for the assembly of hinge systems, but with the optional additional 8 spindle drilling head drillings for our runners and lift systems can also easily be made.

Optional 8 Spindle head: Article No: B9087959
