Managing Director, Sibylle Thierer

Manufacturer - Independent

Modern buildings are intelligent and radiate emotion. As living, interactive centerpieces, they are the provider of important services. They represent an inter-disciplinary creation made by specialists. Location strategists bring in their far-sightedness, politicians provide guidelines and maintain order, investors calculate profitability, environmental specialists exercise their responsibilities, designers comply with challenging design requirements, architects, integrate styles, functionality, knowledge and art, planners take care of professional construction management and engineers are responsible for infrastructure, technology and safety.

As a partner for project hardware, architectural fittings and locking systems, Häfele has access to a global range of new hardware ideas, developments and tried-and-tested systems. The Häfele project hardware range consists of Häfele's Startec range of architectural hardware along with the choicest hardware brands from major global manufacturers and made-to-measure project hardware technology.

Häfele's systems expertise in project business provides what the market needs. Häfele is an expert in seeking out intelligent, innovative hardware solutions with maximum benefit for all parties concerned. The Häfele project specialists are an integral part of the entire set-up, thinking along networked lines and operating on a global level.

Häfele's project customers have access to an international range of Architectural Hardware consisting of a vast range of product items. This catalogue takes you through some of these products which have been specially put together for your market.

Alongside this wide range of architectural hardware, Häfele also has a giant product range of furniture and interior fitting systems. More than 100,000 items for the interior fittings sector have been catalogued by Häfele worldwide. The fact that about 10,000 new items are added every year is a testament to the way in which the product range is kept up to date. The hardware and fittings systems that Häfele uses and combines in projects consist of Architectural Hardware and Furniture Fittings. The combination of both areas of expertise along with the inclusion of a vibrant range of kitchen fittings, appliances, lighting and bathroom fittings, is particularly welcome in areas such as hotel infrastructure, office organization, living comfort and kitchen installations.

Dear Customer,

I am very proud to be able to present you with the **15th** edition of our **Architectural Hardware Fitting's Catalogue**. As you can see it comes in a much handier format and is structured clearer so that you can find the fitting you are looking for easier and faster. You will find a lot of new and exciting fittings in this new catalogue - the majority of which are now available ex stock in our Logistics & Distribution Centres located in different parts of South Asia. These are attractive, hard wearing and reliable products which will make your building look good and which will perform their function well for many years to come - we guarantee it!

Since the last edition of this catalogue the building industry in South Asia has grown with blinding speed. The initial momentum has clearly grown into a fully blown boom. Building methods are also improving and - thankfully - with that the quality of building materials which are being used. The trend of using better quality and more sophisticated hardware fittings has also picked up and the value they add to a building and its interiors is now better understood.

Häfele India has grown beyond our wildest dreams with regional offices in most metros in India. In addition to this we now have four flagship Design Showrooms in four major metros: Mumbai, New Delhi, Bangalore and Kolkata. The company has recently established a firm presence in Sri Lanka by way of a branch office together with three Design Showrooms and a well-networked Distribution Centre. Our employee base has only multiplied in the last few years with a competent sales presence across India as well as in Sri Lanka, Nepal, Bhutan and Bangladesh. We will continue to grow our team in 2016 to provide better and more services to our customers.

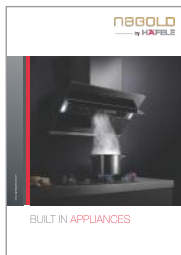

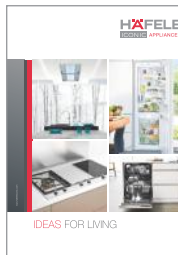

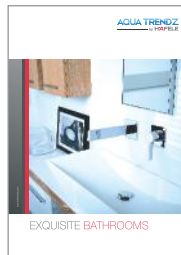

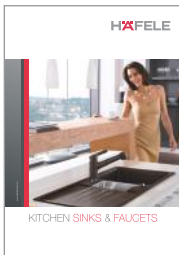

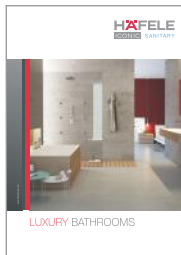

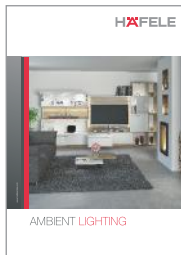

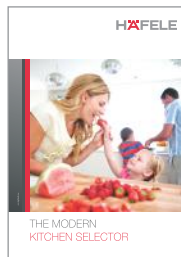

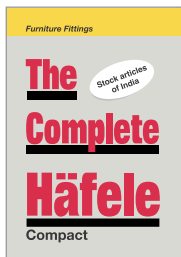

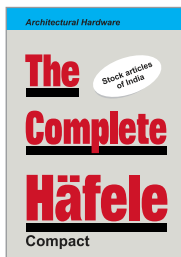

So please enjoy this handy guide for quality hardware fittings and let us have any recommendations in regard to products which you want us to add or any other improvements you would like to see in the services we provide.

As always the HÄFELE Team is looking forward to being at your service.

Warmest regards

A handwritten signature in blue ink, appearing to read 'Jürgen Wolf', written in a cursive style.

Jürgen Wolf
Managing Director
Häfele India Pvt. Ltd.

One-Stop-Shop: Quality means being able to offer our customers the largest range of hardware fittings in the world. With almost 150,000 articles HAFELE is your One-Stop Shop destination for all your home interior requirements including Door hardware, Kitchen and Furniture fittings, Lighting, Appliances and Sanitary Solutions. HAFELE provides a choice suiting everybody's application and budget with unparalleled technical competence and service.

Häfele project customers can rely on industry - specific and project - specific services - Project customers have it easy at Häfele. Not only do they benefit from a fantastic selection of hardware and hardware solutions, but also have access to a useful range of services. A global network of Häfele project specialists is available for providing them with advice, which is particularly important in international projects where, e.g. the architects come from Canada, the property owners come from the United Arab Emirates and the suppliers come from all over the world. Project-related services such as impartial tendering, the working out of locking plans, the sampling of products and CAD programs are prime examples of areas that have been perfectly developed.

Some Indian References Hotels & Resorts

Intercontinental Marine Drive, Mumbai

Taj Residency, Bangalore

The Taj Mahal Palace & Tower, Mumbai

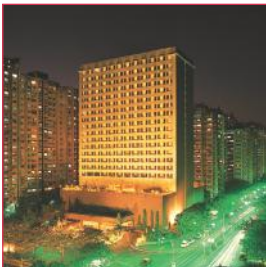

J W Marriott, Mumbai

Le Meridien, Bangalore

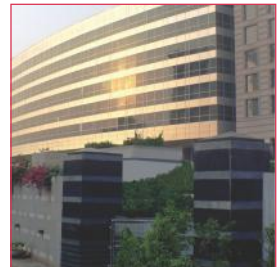

Hyatt Regency, Kolkata

Taj President, Mumbai

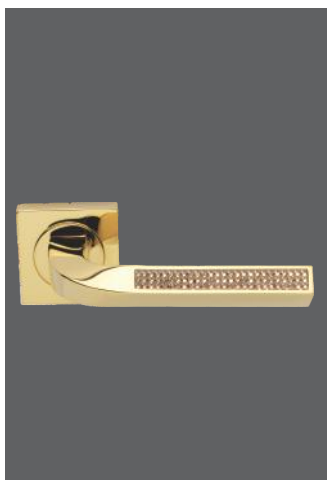

Taj Palace Hotel, New Delhi
