

# DATURA PLUS

WALL MOUNTED COOKERHOOD

Accompanying your hob through the entire cooking process, a cooker hood is an essential part of your kitchen. Häfele brings to you Datura Plus, a new cooker hood from its range of premium appliances to enable highly efficient extraction in your kitchen and a seamless cooking experience. Datura Plus is armed with the new Anti-drip Filtration System, which facilitates better oil/ grease and fumes separation, causes lesser noise and is easier to maintain as compared to cooker hoods with Aluminium mesh filters. This leads to a clean, smoke and odour free kitchen that not only improves the ambience but also puts you in a good mood during cooking! This cooker hood comes with a new oil collector with an eyelet view, a small transparent screen that keeps you apprised of the oil status at all times helping you to time your cleaning accordingly. Also, guiding you throughout your chopping, sautéing or frying is the LED Lighting Panel at the front of the cooker hood and the electronic control display which makes operating Datura Plus a breeze. Available in two sizes 60 cm and 90 cm, Datura Plus with its premium Anthracite finish brilliantly complements various hobs and ovens from Häfele's range of cooking appliances to provide a uniformity to your overall kitchen appearance.

**FEATURES**

The new **Anti-drip Filtration System** in Datura Plus facilitates highly efficient and noiseless extraction. The rising smoke from the cooking process is lighter and passes through the anti-drip filters while the heavier oil particles settle down on the filters and through the curved channels get directed down to the oil collector where they are accumulated. Anti-drip filters don't get blocked with oil/ grease particles over a period of time which prevents dripping of oil back on the hob surface. This also leads to less frequent cleaning of the filter as compared to cooker hoods with mesh filters.

Datura Plus has a **Powerful Motor** with an airflow rate of 800 m<sup>3</sup>/ hour that enables the cooker hood to exhaust a high volume of smoke out of any standard sized Indian kitchen. A constant air circulation and efficient ventilation is maintained throughout the cooking time owing to this suction power.

The **Oil Collector** in Datura Plus collects excess grease from the smoke that passes through the filters. With capacities of 0.8 L (for 60 cm model) and 1.2 L (for 90 cm model), the oil collector requires cleaning less often. Moreover, to keep you informed about its status, the oil collector comes with an **eyelet indicator** that lets you check the level of oil in real time. The oil collector needs to be cleaned when it is filled about two-thirds of the entire capacity.

The **Linear LED Lighting Panel** in Datura Plus provides even cool lighting for your kitchen countertop without any dark spots/ shadows on the cooking area. The lighting works independent of the operation of the cooker hood and hence can be used even while washing, chopping or mixing spices.

Datura Plus possesses a **Feather Touch Control Panel with Electronic Display** which makes operating the cooker hood a piece of cake. The display keeps you informed of the operation of the cooker hood.

The **Premium Anthracite Finish** of Datura Plus complements black hobs perfectly and fits in well with modern and contemporary kitchen designs.

**PRODUCT SPECIFICATIONS**

Model	Datura Plus 60 cm	Datura Plus 90 cm
Article No.	536.80.262	536.80.263
Finish	Anthracite	
Motor	195 W	
Control	3 Speed Control	
Timer Function	Yes	
Airflow Rate	800 m <sup>3</sup> / hr	
Filters	Yes, Baffle Filters	
Noise Level	58 dBA	
Lighting	LED (Cool Light)	
Energy Efficiency	A	
<b>MRP (INR)</b>	<b>25,790/-</b>	<b>30,590/-</b>

The cooker hood should be placed at a distance of **650 mm to 750 mm** above the cooking surface for optimum results. The maximum length of the duct should be **10 feet** for optimum extraction efficiency.

**OPERATION**

Function	Description
	<b>Timer:</b> When the cooker hood is working, if you press the Timer button, the hood will set a timer of 9 minutes, after which it will automatically turn off. During this phase, the LED display will indicate the minutes remaining (9..8..7..6) decreasing by 1. You can exit the Timer mode by pressing this button again.
	<b>Light:</b> Press the Light button to switch on the LED strip light and press it again to switch it off. Please note that the light function is independent of the motor/ fan function.
	<b>LED Display:</b> The LED display is lit up when the cooker hood switches on and displays the speed of the hood while in operation and the time remaining in the Timer mode.
	<b>Speed:</b> Press the Speed button to change the speed of the motor. The speed changes circularly on every consecutive press of the button from low to medium to high and back to low. The speeds are represented respectively on the LED display by numbers 1,2,3... circularly. The default speed is set to low.
	<b>Power:</b> Press the Power button, to switch on and off the hood.
