

## DEKTON SURFACES: NATURAL AND LIQUID COLLECTION

Häfele partners with world's first ultra-compact surface manufacturer - Dekton® to offer you unique surfaces created through an innovative combination of 28 natural minerals found in nature. Its exclusive Ultra Compacting Technology replicates and enhances the metamorphic changes that natural stone undergoes over a millennia through exposure to high pressure and high temperature.

Dekton surfaces are designed to be the toughest and most durable products in the market today with colours that replicate and reimagine everything that nature has to offer. With its large format slabs, Dekton has the ability to fit into and redefine a multitude of applications – shutters and wall cladding (4 mm), flooring (8 mm), and countertops (12 mm) for both inside and outdoors making it every architects' and designers' dream solution.

The new colours from Dekton's **Natural Collection – Aeris, Sasea, Rem and Eter** - seek to offer visual and natural perfection of stone with colors and veined patterns coming together in perfect harmony and true elegance.

**Shell and Sky**, on the other hand, from the new **Liquid Collection**, introduce colours that enhance any surface with a harmonious and eternal look. They visualise the power of liquid, offering a chance to integrate swirling, rippling and fluid ideas into everyday spaces.

### FEATURES

Highly UV Resistant

Stain Resistant

Highly Scratch Resistant

High Resistance to Fire and Heat

Resistance to Abrasion

Resistance to Ice and Thawing

High Mechanical Resistance\*

Non-porous

Waterproof

Colour Stability

\* 5 times the flexural strength of Granite

### AERIS

Aeris is a colour that boasts light tones with cream-coloured detail inspired by White Limestone. This neutral and subtle shade allows for a wide variety of combinations for diverse environments and architectural designs.

Article No.: 562.58.606  
 Slab thickness: 8 mm  
 Dimensions: 3200 (L) × 1440 (W) mm

L : length, W : width

## SASEA

Inspired by Caliza Sahel limestone, Sasea retains its elegant tone, while providing the quality of Dekton. With its greyish-cream tones and a design bursting with details, Sasea keeps its calm and controlled structure.

Article No.: 562.58.617 | 562.58.610\*  
 Slab thickness: 8 mm | 4 mm  
 Dimensions: 3170 (L) × 1440 (W) mm

## ETER

With its dark granite structure in black and grey tones, Eter boasts a background of gentle contrasts, yet has a strong contemporary feel, making it ideal for both indoor and outdoor spaces.

Article No.: 562.58.598 | 562.58.591\*  
 Slab thickness: 12 mm | 4 mm  
 Dimensions: 3200 (L) × 1440 (W) mm

L : length, W : width

\* Stocks of these article numbers will be available by the end of April 2021

## LIQUID SHELL

Celebrating subtlety and softness, Liquid Shell honours what lies beneath the waves in the ocean - the gentle ebb and flow that softens, creating new textures and smooth surfaces with each passing current. The design of Liquid Shell is also inspired by the moon, in union with the ocean's tide. The pearlescent shade is a varying off-white with a rippling pattern of the landscape of the ocean floor.

Article No.: 562.58.627  
 Slab thickness: 8 mm  
 Dimensions: 3170 (L) × 1440 (W) mm

## LIQUID SKY

Liquid Sky's unique characteristics consist of a white base with flowing cloud-like patterned grey veins. The design explores the movement of gravity, the interplay of the elements, their matter, and pays homage to swirling energy and perpetual motion.

Article No.: 562.58.647  
 Slab thickness: 8 mm  
 Dimensions: 3170 (L) × 1440 (W) mm

## REM

Rem is inspired by one of the most elegant white marbles on the market; its intricate design, with brown and grey veining and hints of gold, reflects the traditional and almost linear structure of Calacatta Lincoln itself.
