

Introduction

Dear Customer,

Häfele has now pioneered the way interior fittings are sold in South Asia for over 15 years. Being a German company our foremost concern has always been to offer our customers products that are at the cutting edge of functionality and design; and backed by the highest standards in Customer Service. In our market, we are increasingly being recognized as “one brand with many solutions”, enabling functionality for any interior design through a holistic solution offering - by way of door hardware, furniture or kitchen fittings, sliding systems, built-in appliances, bathroom solutions, furniture lighting and interior surfaces.

Taking this proposition ahead, we are now setting foot into the space of “smart homes” through our exclusive range of home security solutions. For over ninety-years, Häfele has invested technology, expertise and research to bring the finest technology by way of access control systems to the most prominent Hotel Groups of the world. Our success in this business has motivated us to now direct our experience towards the home security segment with a range that is smart, cutting-edge and easy to use.

Häfele’s RE-invent Series of Digital Home Security Solutions comes with a host of features that will redefine the way you secure your homes. Through a variety of access modes, including fingerprint, keypad and face recognition access, and different locking modes as well as smart features, this range holistically addresses your home security needs. It allows you to combine different access modes and locking functions to customize a solution that can address every individual situation that you may encounter in the area of home security. Every technology integrated into these solutions has been benchmarked to the highest standards of operational efficiency; assuring you an easy and peace-of-mind experience. Most importantly, Häfele’s RE-invent Series has been meticulously designed not just to provide security but in fact to manage access to your homes – allowing the right people in and keeping the wrong people out.

So come and experience this new approach to ‘secured living’ at any of our Design Showrooms across the country - I look forward to an inspired dialogue with you.

Hafele

Reassuring Expertise

"For over 9 decades, we've been helping people make more of their homes.

Established in Germany, and now operating worldwide, we specialise in the fittings, hardware and systems that improve the way your home, works. So when you choose our products as part of your new or reformed home, you know you're getting the benefit of extensive knowledge and decades of experience.

And we're still a family business, owned and managed by family members who really care about the products and

service we provide. You can rely on our commitment to the highest standards of quality and reliability, founded on a long tradition of German engineering where attention to detail is second nature.

All our home improvement ideas are built to last – day in, day out – we want you to get the very best from every corner of your home, for many years to come."

Hafele

Worldwide

With its origin in 1923 in a small town named 'Nagold' from the Swabian region of Germany that nurses a passion for hardware technology, it is no surprise that Häfele has lived up to its roots through a successful presence in the architectural and furniture hardware industry for over 9 decades now. Today, Häfele's worldwide penetration includes 38 subsidiaries across Europe, America, Asia, Australia and New Zealand. With these subsidiaries and numerous other sales organisations, Häfele operates in over 150 countries. The Häfele headquarters, 4 manufacturing units and 10 sales offices are located within Germany; while 1 manufacturing unit is located at Budapest, Hungary. The company also owns one of the largest and most sophisticated warehouses in its home country. The Häfele worldwide workforce is empowered by a base of over 7600 employees.

The group services over 150,000 customers across the globe through its extensive range of hardware products and a comprehensive logistics system. In addition to this, Häfele also provides consultative services to its customers, educating and advising them about buying the correct hardware as per their requirements. With this level of market penetration and ability to handle worldwide demand, it comes as no surprise that the company is an authority in the segment of home interior solutions; what is pleasantly surprising, though, is that in spite of its size, Häfele still remains a family owned and run business with a unique, friendly and value-centric work culture which is strongly followed among all its subsidiaries.

Hafele India

Häfele India is a wholly-owned subsidiary of the Häfele Global network and has been operating in India since 2003 under the leadership of Mr. Jürgen Wolf (Managing Director). The ability of the company to understand the diverse Indian market has made it an authority in the field of architectural hardware, furniture and kitchen fittings and accessories. The company also has a strong presence in synergized product categories namely Appliances, Lights, Sanitary and Surfaces catering to the focused demand from these industries.

The subsidiary has a strong nation-wide presence with offices in Mumbai, Pune, Ahmedabad, Bangalore, Chennai, Hyderabad, Delhi and Kolkata. It has full-scale operations in Sri Lanka and Bangladesh with Regional offices and Design Showrooms in both the countries; and has also spread its sales operations to other countries in South Asia including Nepal and Bhutan.

Häfele's design showrooms are hubs of international home interior trends and cutting edge designs presented in a world-class environment, where customers can see home solutions in their inherent applications. These showrooms function as a one-stop-shop for all home interior and improvement needs - from providing in-depth technical advice to kitchen and wardrobe designing services through a team of experts stationed at the showroom.

Häfele India services its customers with a base of over 850 employees, a well-networked Franchise base of over 80 shops along with over 1000 dealers situated across South Asia. The subsidiary has a sophisticated Logistics centre in Mumbai along with distribution centres in Delhi, Bangalore, Kolkata and Colombo respectively.

Back to the Future...

One area that has seen a major evolution over the last 10 decades is 'home security'. In ancient times people kept their doors open and the intangible 'neighbourly trust' was enough security for their homes. But with migration of people from one land to another, suspicious strangers gradually replaced friendly neighbours and tangible security replaced neighbourly trust. People wanted to keep strangers out of their homes and they did this with the help of a key...

Over the years, evolution in living patterns has demanded more from the traditional key than mere home security. Today, people want smarter and convenient options to manage the access to their homes - the question is no longer about who stays out of the house but who can be let in. We are moving towards 'a future' where the inadequate key will hold little importance in front of integrated digital access control systems that provide more security, more convenience and smarter lifestyles.

#CanAkey...?

Allow remote access?

Manage selective access?

Smile its way to opening a lock?

Raise alarms during break-ins?

Tell who tried to break into your home?

Be trusted?

Like in ancient times, people are moving 'back' to intangible ways of securing homes - earlier it was by trusting 'neighbours' who you knew would never break-in to your homes; and today it is by trusting 'digital technology' that can help you manage the access to your home. We are moving towards 'a future' where the inadequate key will hold little importance in front of integrated digital access control systems that provide more security, more convenience and smarter lifestyles.

It's time to 'REinvent Access' ...

A number of trends are changing the spectrum of home security among urban dwellers today. This is happening as a result of common challenges that orbit around the conventional lock-and-key mechanism.

And so, we would like to know...?

“Have you literally pulled your hair out when you are stranded outside the house with a forgotten key hanging indoors?”

You would be lucky if a friendly neighbour keeps a spare key to your house and lets you in. But wouldn't it be ideal if the access to your home depended entirely on you than on a tangible key?

“Have you ever struggled to enter your home late at night in a pitch dark corridor, stressing to get your key into the key-hole?”

You would be lucky if your eyes had special powers to illuminate your surroundings. But wouldn't it be ideal if your door lock had the power to enable access to the home even when the lights go off?

“Have you compromised on that afternoon siesta just to keep a check on your energetic and curious child from wandering out of the house unnoticed?”

You would be lucky if he preferred reading a book over playing in the mud outside. But wouldn't it be ideal if you could be instantly warned when your child so much as grabs the main door handle so that you can stop him before he runs off?

“Have you sat at a Police Station for hours trying to locate the burglar who broke into your house and stole your prized possessions?”

We sure hope this has never happened to you. But wouldn't it be ideal if you leave no chance for such a situation to arise with a fully secured lock setting that not only prevents a break-in but also tells you who tried to break in?

Häfele introduces a new perspective to home security with its integrated range of Digital Home Security Solutions. With this range we bring to you the most advanced technologies in digital access modes, safety features, convenient settings and much more; attempting to provoke a serious thought towards home security. These solutions from Häfele can allow you to control multi-dimensional aspects of home access through a single locking device, as per your specific lifestyle and at the leisure of your convenience. So it's time to move to a smarter way of life - **it's time to “REinvent Access”!**

RE-Bell

RE-AL

HAFELE

RE-Veal

RE-Place

HAFELE

HAFELE

RE-Size

The following mnemonics and their corresponding descriptions will familiarize you with the kind of access modes, operative functions and technologies that are part of Hafele's new Digital Door Security Solutions. It's time to adopt new technologies for securing your home – it's time to REinvent access!

Access modes

Access modes are functions that allow you to unlock the door. Through this new range, Häfele offers the latest techniques to access your home at the convenience of your finger-tips, and we mean that literally!

Face Recognition Access:

Face Recognition adds the fourth dimension to digital door security where the access to a home is enabled by just a scan of the face. We bring to you the most premium technology in face recognition through the Häfele RE-Veal Lock – where the facial scan is done for over 170 points on the face making it a highly precise and secured method to recognize an individual's identity.

Finger Print Access:

Finger print access allows you to unlock a door when a recorded finger print matches the scanned finger print. You can leave behind the hassles of carrying a key around because you are now the key to unlocking your home!

Capacitive Finger Print Scan:

Häfele's RE-AI and RE-Size digital locks use the capacitive finger print scan technology which is more responsive to any object and reacts with more accuracy.

SILK ID Finger Print Scan:

Häfele's RE-Veal digital lock comes with the FBI approved SILK ID scan which can detect a finger print irrespective of your finger being dry, oily or wet.

Key-pad Or Password Access:

A key-pad access allows you to unlock a door by keying in a unique numeric access code (or password) using a digital or mechanical number key-pad. You can now happily forget your key in your house, knowing well enough that your memory will aid you with the access code to your home! Häfele's range of digital locks allows you to set up to 100 passwords with different access rights.

RFID (Radio-frequency Identification) Access:

RFID access allows you to unlock the door by showing the RFID keycard to the lock; the lock recognizes the unique code embedded in the keycard through a radio frequency and unlatches the door. With Häfele's reliable and innovative Mifare contactless technology, you can even configure the access code within your existing Mifare enabled credit card so that you don't need to carry an additional keycard!

Mechanical Key Access:

All Häfele Digital Locks come with a set of mechanical keys for emergency access situations like technology failures or battery discharges. Our mechanical keys come with a computerized cross design for additional security; the duplication of which is close to impossible.

Remote Control Access:

To bring in the added convenience of managing your home access even from a distance, Häfele offers you the option to pair any of its digital locks from the Reinvent series to a remote control device; your door can then be unlocked at your fingertips from any distance within 10 meters of the lock. Now you need not walk all the way to your main door to let an expected guest into your home!

Locking modes

Every locking device has two principal functions - closing the door through a latch and locking the door through a deadbolt. Häfele's new range of digital door security systems brings to you additional security through a host of locking modes as well as different access rights for different types of users:

Auto Locking Mode:

On choosing the auto-lock mode, the door gets locked automatically 2 seconds after it closes; you don't have to manually rotate the lock deadbolt to lock the door. The auto locking operation is either enabled through a magnetic sensor technology that pulls out the deadbolt once the door closes or alternately, through a simple technology where a trigger is sent to the deadbolt when the auxiliary latch presses against the strike plate.

Manual Locking Mode:

This mode can be enabled for doors that are positioned in areas which have high movement traffic; for e.g. a corridor door between your living room and bedrooms or typically a door in your office or boutique shops. In the manual locking mode, the user has to physically lock the door by touching the front pannel/finger print scanner when required. The manual locking mode is also an ideal back-up in emergency situations like technology failure or when the battery discharges.

In Häfele's RE-Veal lock manual locking mode can be activated by turning the lever handle in the upward direction.

Privacy Locking Mode:

The Privacy mode can be enabled from the inside by pressing a safety button on the rear lock body and is used to restrict access into your home. A typical situation where you could use the Privacy Mode is when you want to restrict the access to the house for your house-help only for the stipulated duration in the day when she is required to come in to do the daily chores. In case she tries to access the house at any other time of the day by using her access rights (password/fingerprint/face recognition) the door will not unlock if the Privacy Mode is activated. The only way a person can enter your home from the outside, in such a situation, is by using the mechanical key.

Defense Locking Mode:

The Defense Mode can be enabled from the outside by pressing a button on the front lock body and is used to notify if someone is trying to leave the house. A typical situation when you could use the Defense Mode is when your partner activates this mode while leaving the house and you want to take a nap yet ensure that during this time your child doesn't leave the house without your supervision. In such a case the moment your child presses the lever handle to open the door, an alarm sets off informing you that someone is trying to leave the house without your permission.

Access rights

Super Admin Rights for the 'Family Alpha':

As the 'Super Admin' user you can add a new admin and modify or delete the rights of an existing admin as well as user's guest access rights. You can also reset the lock, get into the settings and check the logs, modify rights of the admin, perform data query, access advanced options, upload user data and update the firmware.

Admin Rights for the 'Next in Command':

As the 'Admin' user you can add, modify or delete a new user or access rights of admin, of a user or that of a guest. But you will not be able to register a super admin, modify rights of the super admin, perform data query, access advanced options, upload user data and update the firmware.

User Rights for the 'Regulars':

With 'User Rights' you will be given a pre-set unique password to allow you to access the home at any point of time.

Guest Rights for the 'Seldom visitors':

You can set a one-time-password for visiting guests to allow them into your homes – very handy when your guests arrive before you or want to use your home for a few days while you are away on a vacation!

Smart technologies

Through this new range of digital door security systems, Häfele introduces some smart technologies that will enhance convenience, allow ease-of-use and bring in more security in the daily operations of your Digital Lock.

Smart Password:

The smart password technology allows you to hide your numeric password between random numbers. Let's assume that your password is 12345678; the Smart Password function allows you to hide this password before, after or in between other random digits, for example: 9876123456784901. The password can be set up to 8 or 12 digits while the random cushioning numbers can be included up to 30 digits. This function is particularly helpful when you don't want to reveal your password to a person standing next to you while you are accessing your home.

Smart Voice:

Every Digital Lock from Häfele talks to you during the instances at which you engage with the lock. These interactive engagements could include step-by-step voice guidance by the lock while adding a user, setting a password or enabling a function/mode; or simple voice notifications from the lock about the various operative modes or incorrect usage of the lock.

Smart Etiquettes:

Since every digital lock from Häfele talks to you, it is pertinent to have the right etiquettes to adjust the volume of the lock voice. This technology allows you to seamlessly adjust the voice volume or put it on mute, especially when you are entering your home in the wee hours of morning ensuring that your neighbours are not jolted out of their sleep by your talking lock.

Smart Security:

With the different access modes available in the Häfele Digital Locks, you can enable additional security by combining two access authentications; for example, in case of a new house-help who is yet to earn your trust, it could be unsafe to just give her a numeric password access as you could be in danger of her sharing this password with an ally. In such situations adding a face-recognition access as the second authentication can ensure that the person entering your home is not an unwanted stranger.

Smart Visitor Image Capture:

Häfele's RE-Bell Video Doorbell allows you to know who had visited your home even when you were not around to receive them. Every visitor's image and video call can be viewed live if you are around to receive it and is also recorded for you to see in your mobile App later. In fact, even if you are in a no network zone or your phone is on flight mode and during that time if a guest visits you, the bell clicks and saves the image of the guest on the server which can then be viewed in the app later. You can now be rest assured that no guest coming to your house goes unnoticed.

Smart Freeze:

The Häfele Digital Locks have a narrow tolerance for incorrect entries of access by way of a wrong password or unfamiliar fingerprint – 5 to 10 wrong entries result in a lock-freeze for up to 5 minutes. This feature reduces the possibilities of unwanted break-ins.

Smart Intruder Capture:

RE-Veal, the face recognition lock by Häfele, not only enables the highest level of security for your home but also tells you if someone tried to disrupt this security. Its Smart Intruder Capture technology records the face of any unregistered user who has tried to break into your home. The lock can pull out up to 10 such images in case you want to do an instant check.

Smart Night Vision:

A feature unique to Häfele's RE-Veal Face Recognition Lock and Häfele's RE-Bell Video Door Bell, Smart Night Vision uses infrared technology to recognize a visitor's face even in pitch darkness. This feature comes most handy when you or your guests are trying to access your home in the dense hours of night when the overall lighting in your building corridors is dimmed out or completely turned off.

Smart Video Phone/Smart Visual Speech:

Häfele's RE-AI and RE-Place digital locks can be paired to an existing Video Door Phone using a simple radio frequency unit. Once connected, your Video Door Phone and Digital Lock work seamlessly together as one gadget allowing you the benefits of interacting with a visitor at your doorstep while also enabling you to unlock the door to him through the key button on your video door phone; another feather of convenience to manage your door security system from a remote location. And in case you don't have a Video Door Phone, you could consider Häfele's RE-Bell video doorbell which acts individually as a video door phone and cohesively as a complete security solution when clubbed with any of our digital locks!

Smart Storage:

Häfele's RE-Bell Video Doorbell comes with the added advantage of recording video footage and that for 24 hours continuously! This Smart Storage feature allows you to keep a historic perspective on who entered your home; not just through time logs but through actual videos. The only requirement is that your App-enabled phone (which is paired to the lock) should have an SD card as the videos recorded automatically get saved in the storage memory of an SD card.

Smart Motion Sensor:

Häfele's RE-Bell Video Doorbell comes with an intuitive smart motion sensor feature which when activated senses the presence of a person or any other moving object within 3 meters of the camera lens. Such a realization is then sent to you as a notification on your App-enabled phone alerting you that someone or something was hovering around your main door; an ideal option to enable increased security for your home.

Operational features

These basic operational features will complete the holistic solutions proposition of Häfele's new range of digital door security systems

**Panic Exit:**

In case of emergencies, you can exit your homes by simply pressing the lever handle on the lock irrespective of the locking mode that has been activated.

**Non-handed Operation:**

All the locks under Häfele's new range are non-handed; this means that they are compatible for DIN-left or DIN-right applications as per the choice of the user.

**Audit Trails:**

Häfele's Digital Locks allow you to retrieve a detailed log of the number of entries into your home, number of exits from your home as well as the date and time of these movements.

**Jump Start:**

Häfele's Digital Locks allow you to re-operate the lock from outside in-case if the battery is depleted. This feature can be used by using a 9V battery or a portable power bank with the front pannel.

Alarms

Häfele's Digital Locks can indicate the following events through different alarm features

Low Battery Alarm:

Sets off in case the battery of the lock is very low or nearing discharge.

Door not Locked Alarm:

Sets off in case the deadbolt is not properly engaged and the door remains unlocked.

High Temperature Alarm:

Sets off in case of a fire or any other event where the inside room temperature touches or exceeds 70°C (the alarm can be deactivated either by removing the battery or waiting till the room temperature falls below 70°C).

Break-in Alarm:

Sets off in case an intruder tries to forcibly break the lock to enter your home.

Lasting Battery Life:

Häfele's Digital Locks come with long duration AA batteries which have been tested to run on an average of 3000 opening-closing cycles (approximately 3 months). Our Face Recognition Lock, RE-Veal, comes with rechargeable lithium batteries which have been tested to run on an average of 8000 opening-closing cycles (approximately 1 year) when fully charged.

RE-Veal

Because you need the highest
form of security...

RE-veal

For the Judicious-jivers who would go the extra mile to choose the best and most holistic solution available; a profound lot who leave nothing to chance...

Smile for Security: Häfele's RE-Veal Digital Lock carefully scrutinizes every individual need that you may have from your home security system and presents itself as the ideal answer for all those needs. This fully-loaded face-recognition lock comes with the highest standards of technology that reads over 170 points on the user's face – this means that it is highly sensitive to even the flinch of a nerve on your face and will only allow access if you exactly emulate the expression that was pre-set as your access recognition. With 5 different access modes – Face Recognition, Finger Print, Key Pad, RFID and Mechanical Key – Häfele's RE-Veal Digital Lock is the authority in home security and access planning. For double assurance, you can combine two access modes as per your choice, making it impossible for any unwanted break-ins. And should someone dare try a break-in, our integrated intruder-capture feature can show you an image of the person who made this futile attempt. Häfele's RE-Veal Digital Lock comes with lithium batteries that are tested to last for 8000 cycles (or approximately one year) providing you with a hassle-free experience. The most singular feature that sets it apart from others is RE-Veal's night-vision that recognizes a registered face even in pitch darkness. So it's time to leave your security worries behind, flash your best smile at this miracle machine and let yourself in...

RE-Bell

Because you need
a 99.99% "100" percent...

RE-Bell

Häfele's RE-Bell video doorbell completes our offering for holistic home security with an added touch of smartness. This WiFi enabled solution can be integrated into your smartphone through a feature-packed app that allows you to remotely manage all functions at your fingertips. This means that you could be lazing in your bed or sitting at your office desk or shopping at your favourite mall and yet you can see or even talk to the person standing at your doorstep. This takes care of security even from remote areas while also ensuring that you never miss a chance to know who tried to reach you while you were away. You can also capture intruder images to keep a special check on strangers or unwanted visitors; and this is possible even in pitch darkness thanks to RE-Bell's integrated night-vision function. The highly sensitive motion sensor immediately recognizes the presence of a person and sends you an alert on the mobile app informing you that someone is awaiting access to your home. You can also download a log of recorded video clippings from RE-Bell through the mobile app – giving you a historical perspective on who tried to reach you and when. The RE-Bell Video Doorbell presents the highest standards of technology through its High Definition (HD) video quality and 165 degree rotational camera.

Scan the QR code to download quickly and install

3. Add device
Enter the home page, click "+" to select the Doorbell, select "Doorbell (Power version)" and follow the APP page to complete the operation.

5. Set WiFi

Please enter the wireless WiFi account and password. If prompted binding fails, please check if the phone is connected to the normal WiFi network, and then continue.

2. Registration and login in APP
Open the App and click "Sign Up" to register; if you have an account, click "Sign In".

4. Connect to device
For Android phone: add the device's CID in "Nearby Devices" page. For iPhone: Go to system setting -> click "WLAN" and choose "DG-*****" to connect, enter the code 11111111; then go back to the App and click "Next".

Tips: It's normal that mobile phone networks will switch automatically

6. Call and use

Features

Infrared Detection

Upto 3 meters monitoring allows you to record videos, even in dim lighting, thanks to the Infrared Night Vision.

Motion Detection

Automatic snapshot in case of abnormality and you receive alerts and active video recording.

HD Video

See your visitor upto
1280 X 1080p HD and 3x zoom

165° angle of view

Hafele's RE-BELL always keeps an eye to know who's at your door; even if you're not home.

Two-way Audio

Through the built-in microphone, you can see and speak with visitors at your door with your smartphone.

RE-Bell (Wired)

- See and talk with the person on smartphone.
- Never miss an important package or visitor again!

Visual Speech

Infrared Night Vision

Visitor Image Capture

Micro SD Card & Cloud Storage

Wifi Connection

Receive Alerts on Smartphone

Connected with Wifi, you will get immediate alerts in APP when visitors press the DoorBell.

Bell Accessories

You can hear the bell at a distance of 30 meters when the visitor is on the doorbell.

Secure Video Storage

Cloud Storage

Free 15 day cloud-recording service for motion pictures and the snapshot of visitors.

TF Card (max 128GB micro SD card)

Record each video so that you can download or watch it at anytime.

(to be purchased locally)

Special Applications

Häfele's RE-Bell Video Doorbell comes with an IP65 rating which means that it can be suitably installed in outdoor applications and yet remain unaffected by exposure to the most harsh weather conditions.

A unique application for Häfele's RE-Bell could also be indoors in the room of your old parent or young toddlers allowing them to reach out to you by the click of a button in case of any emergencies; no need for smart phones or additional security – RE-Bell takes care of them while you are away.

Cautions

- Safety precautions are for the user's safety and to prevent damage to assets and inconvenience. Please read through these precautions in order to properly use the product
- The accuracy of the door preparation is critical for the proper functioning and security of the product. Misalignment can cause performance degradation and lessening of security
- Product images in this document are for reference & presentation purpose only. They may differ from the actual product.

Recommendation

- It is highly recommended to use a door closer on the door which is installed with a digital lock. Select a door closer based on specified door dimensions.
- Consider additional 10kg while calculating door weight of the door on which the Digital Lock is to be installed. This parameter of door weight calculation is to be considered while selecting door hinges and door closer for the respective door.

Do's

- Please keep your password safe - the passwords should be changed on a regular basis.
- In case of RE-Veal, RE-AL and RE-Size Locks the master (manager/admin) function should be used by the main owner of the house. This master function can be set or deleted by the manager only.
- In case of RE-AL, RE-Size and RE-Place Locks, please change the management or factory password to another password right after the installation of the product.
- Please regularly check the battery's tear fluid or the terminal's condition. Make sure you insert the batteries correctly to match the product's polarity (+/-). Inserting batteries in the wrong direction or wrong polarity in the battery compartment may lead to fluid tears or ruptures.
- The RE-Place lock cannot be factory reset. Hence please keep the master password safe. If forgotten the user will not be able to modify any settings. The only solution would then be is to replace the back panel of the product.
- Please keep the mechanical keys of the product handy and safe – as mechanical keys cannot be remade.
- Keep your finger, screen and camera clean while using the product.
- Use a soft and dry cloth to clean the product.

For RE-Veal lock:

- New lock cannot unlock with ANY verification. The First user registered is always registered as a super admin.
- Please recharge the battery once the lock prompts "low Battery". Use the original charger only to charge the batteries.
- It's forbidden to remove the battery, if you need to replace it with any new battery, please operate under the guidance of a professional.
- Without any operation the lock will be powered off within 10 secs

Don't's

- Do not recklessly disassemble or modify the product.
- Do not insert batteries in reverse positions; it may result in liquid leakage or rupture.
- Do not mix different types of batteries - Replace the batteries once they are depleted, and make sure to replace all batteries with new ones instead of just a portion. Do not mix new batteries with old batteries or with different brands.
- Do not install, disassemble or repair without the assistance of a product repair technician.
- Do not press or insert the buttons with pins.
- Do not give excessive impact on the product.
- Do not use the product for any purpose other than a digital door lock.
- Do not let water or other liquids enter the product.
- Do not subject the product to any severe impact.
- Do not install the product in an area that is directly exposed to the external environment.
- Please make sure there is no dew condensation at the site of installation. During winter or seasonal transition periods, the severe difference in indoor and outdoor temperature may cause dew condensation, which may lead to product defect when a certain level of moisture enters the product. This may require services at a cost, so please make sure to remove any source of dew condensation through periodic ventilation or paper weather stripping.

Warranty

- **All products carry a warranty of 1 year against manufacturing and functional defects.**
