| Remote control compatible: | Yes (to be purchased separately) |
| Cycle Testing: | 1,00,000 cycles |
| MRP (INR): | 21,855/- |

**Note:** The stocks for this lock are now available. Special prices valid only till stocks last.

**Multiple Access Modes:**
Register up to 100 RFID tags and 1 common pin number. It also comes with non-duplicable high security mechanical keys and an emergency recharge opening.

**Random Security Coding:**
Enter random fake numbers before or after your password in order to confuse people peeping at you while opening the door.

**Multi-touch Security Feature:**
Enter three random numbers (displayed on the screen) after entering your original pin number to open the door. This feature helps create additional fingerprint residue on the numeric keypad thus preventing the original pin number from being exposed.

**Guest Password Facility:**
Register a temporary 4 to 12 digit security code for a one time use to let your guests access entry to the property without them knowing the original pin number.

**Forced Lock Feature:**
Press the open/close button located on the main body for 3 seconds to force lock the door from inside. The door can only be opened by using a mechanical key from the outside (RFID card and password entry won't work)

**Low Battery / Anti-Hacking and Anti-Fire Alarm:**
Designed for internal safety, this model comes equipped with an 80 dB alarm which goes off incase the batteries completely run out of power or if there are attempts to damage the lock or force the door open. It also comes with an anti-fire alarm which gets activated if the heat sensors detect an abnormal rise in the room temperature (62˚C ± 5 ˚C). In this case the lock automatically unlocks the door.
