

HÄFELE BATH CONCEPTS
JEE-O SOHO AND SLIMLINE SERIES

Ever-lasting durability, ultimate sophistication and incomparable European manufacturing quality define the New Bath Concepts by Häfele. These fittings create an ambience of refined functionality in your bathrooms, providing tranquility, peace and space for your body and mind.

Although different in design and structure, the two JEE-O Series of bathroom fittings by Häfele, Soho and Slimline, at their heart, follow the principle of product longevity and functional luxury. The products in the Series are made of Stainless Steel Grade 304, and as a result are extremely sturdy and long lasting. Compared to similar products in the market which use Brass for internal parts, the concealed parts of these bathroom fittings by Häfele are also made of Stainless Steel Grade 304 which makes it a lead free and eco-friendly solution. This prevents hazardous health and environmental effects and reduces long term maintenance costs.

Häfele's JEE-O Soho Series is characterized with a dark, all-weather hammer coating which grants your bathroom the right industrial look and emphasizes on maximal minimalism. Bathtubs and basins in this range are made from DADOquartz, a light weight, sturdy and scratch resistant material, to preserve their beauty for years to come. The fittings from Häfele's JEE-O Slimline Series, slim in form and style, are designed as contemporary art pieces to suit modern bathroom spaces.
