# ASKO

Long, dark winters with short eruptions of bright summer; nature is key, and our main source of inspiration. It made us what we are – creatures yearning for warmth and light. It also made us aware of what we have – forests, mountains, plains, and archipelagos, landscapes and seascapes with winding sharp shore lines in between, an abundance of beauty. Function was always vital for survival as climate was harsh and resources were scarce. That is why, it seems, form and function are inseparable, and to the very core of Scandinavian design; it is what it is, purely practical and simply beautiful. ASKO is no exception.

The Scandinavian nature carries Asko's idiom; grand in its simplicity; functional and presented in nature's own colours. This is design that will last over time. This is ASKO.

# Design Ranges

We think it is important to have a kitchen that matches your personality and way of living. The ASKO design series by Hafele offer a wide range of products, all designed to create your perfect home. Regardless of which series you choose, the design is timeless yet trendy, to keep that feeling of novelty in your kitchen for a long time.

## Elements

In chemistry, the four elements refer to the pure substances that cannot be divided and that create our universe – fire, air, water and earth. Scandinavia's geology is featured by the mysterious, exclusive look that appears to be black, shifting to brown or grey thanks to its dual layer of surface coating. It is refined, yet simple. It is pure and down to earth. It is Elements by ASKO.

## Craft

This design range is Asko's tribute to the Scandinavian history of craftsmanship, design and inventions. Details are passionately taken care of to create a solid and seamless kitchen experience. Stainless steel, solid metal knobs and sturdy steel handles are there to help you succeed in the kitchen. You can choose between the traditional stainless steel or the new colour – Black Steel. This is Craft by ASKO.

## Pro Series™

Do you dream of having your own professional kitchen? Then you should meet the Pro Series design range. The stylish stainless steel look featuring large clear doors for maximum view will make you look like a pro even before you start cooking. The many features and high quality details such as robust steel handles and high-quality enamel in the ovens will make you a true kitchen pro.

# Elements

Elements by ASKO is a unique combination of state-of-the-art technology and amazing design. In this series, Scandinavia's geology is featured by the mysterious, exclusive black pearl glass surface, created by a layer of small steel particles that make the colour shift depending on the ambient light.

The brushed steel handles are elegant and the matching side trimmings make sure all units align perfectly in your kitchen. All displays and controls are digital and easy to use. The appliances are packed with smart functionalities to make you the kitchen star.

# THE ELEMENTS OF DESIGN

## Tradition and technology in perfect harmony

With Hafele's Elements by ASKO there are no compromises when selecting materials: only the highest quality stainless steel and ceramic glass is used. Dials are formed from solid metal and pan supports are of the highest-quality cast iron. Elements by ASKO stands for a new interpretation of craftsmanship, using advanced technology. The clean lines and graphic divisions are apparent from a distance; from close up you notice the richness of the detailing and exceptional high quality finish. It is a unique range that includes the ultimate home chef equipment.

45 CM STEAM OVEN  
OCS8478G  
WARMING DRAWER  
ODW8128G

# Craft

This design range is Asko's tribute to the Scandinavian history of craftsmanship, design and inventions. With a minimalistic design, the products come in traditional stainless steel, soft graphite black or in the newest of our colours – Black Steel.

The solid metal knobs and sturdy steel handles are designed to be safe and user-friendly even for small hands helping you to cook. The displays are often a combination of digital and knobs in order to make features as well as actual status easily accessible.

# CRAFTED ELEGANCE

ASKO kitchen appliances by Hafele are crafted with passion for detail to deliver performance and precision. Functionality and durability inspired on professional use and expertise to enrich people's lives. In this, they find their sense for design and materials seamlessly integrated in contemporary interior.

Asko's expertise turns an oven into an instrument of precision. They use carefully selected and sustainable materials which make their product elegant looking and long lasting. Their craftsmanship creates this range characterized by exceptional finishing, intuitive interface and sophisticated glass doors all of which integrate into a one piece seamless frame. The big glass door emphasizes on the large oven volume and gives full visibility into the cavity.

# Pro Series™

If you dream of a professional kitchen at home, you will love the Pro Series™. The stylish stainless steel look in combination with large, clear glass doors for maximum view will give you that right professional feeling in your own home. Add the seamless, robust and high-quality design details and you have a kitchen for life.

Let each appliance in the Pro Series stand out to be a design object itself or, use the same front as in the rest of the kitchen cupboards.

# FOR THOSE WHO EXPECT MORE

Asko has been selling high quality appliances to demanding customers for over 60 years. This has given them all the experience they need to create a range of appliances for the kitchen that will move the design philosophy and quality thinking a step forward. The name of the range is ASKO Pro Series™, a hallmark of high quality and thoughtful design in every detail.

ASKO

# COOKING

HOOD IN HOB

# Imagine a kitchen with clear view and clean air

The idea behind the ASKO Hood in Hob by Hafele is simple. It's for those of you who want to enjoy your beautifully designed kitchen, without any distracting cooker hood in the field of view. For architects and designers, the ASKO Hood in Hob opens a new field of kitchen designs, in which they don't need to consider whether to hide or highlight the cooker hood.

The Asko Hood in Hob by Hafele will give your kitchen a complete new look. Without a bulky cooker hood in the kitchen, more attention is drawn to the kitchen design itself, which gives you greater opportunities to create a harmonious design without interruptions and disturbances.

A clear view is also true for the hob itself. No distracting metal casing or elevated air intake. The only sign of an extractor is the narrow gap that runs in a square in the middle of the hood. There are no caps or other devices that need to be folded out, only a smooth surface. This gives the hob a clean expression while offering greater ease-of-use because you can freely move pots and pans all over the hob.

The integrated extraction surface is also very easy to clean as it is in the same material as the rest of the hob - extreme heat and scratch resistant ceramic glass.

# Effective fume removal

The hood uses the fact that fumes from cooking rise more slowly closer to the source than higher up in the air. The significantly higher air speed that the fan provides, draws the fumes off from the point where they arise, directly at the cooktop.

# Give your kitchen a fresh start

Hidden deep underneath the stylish matt black surface of the hob is the extractor that efficiently removes moisture, fumes and grease. The only evidence of its presence is the discrete extraction zone placed in the middle of the hob.

## Lower noise level

Because the extractor and motor are positioned close to the floor and not at the same height as your head, you will experience a significantly lower noise level.

## High grease capacity

The fat that the air stream fails to transport directly to the filter, ends up on a sloping surface from where it finally flows into the filter. The filter can hold up to 200 ml of fat. Excessive amount of fat ends at the bottom of the filter, with an additional storage space.

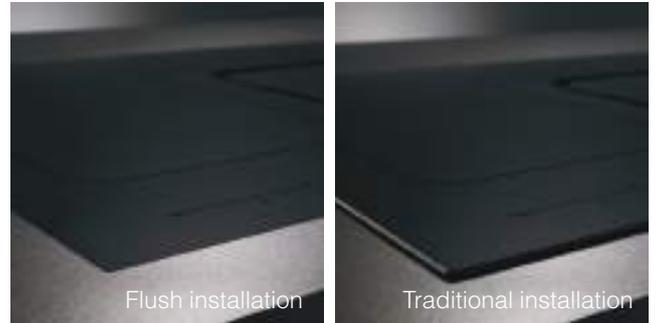

## Completely flat surface

The extraction zone is completely flat and made of the same matt ceramic hardened glass as the rest of the hob. This increases usable space on the hob and makes it possible to move around pots and pans more freely.

# Hood in hob highlights

## Installation

Scandinavian design implies clean lines and harmony in every detail. According to the same tradition, Asko has designed the Hood in Hob for flush installation with the countertop. It can of course also be installed traditionally, on top of the countertop.

## A filter with double action

The ASKO Hood in Hob by Hafele is fitted with a Twin Filter System that efficiently cleans the air twice, in one and the same filter. When it's time for cleaning, just lift the filter from the hob and place it in your dishwasher and it will be cleaned in the most hygienic way.

## Flexible Bridge Zones™

The flexible Bridge Zones™ let you bridge two cooking zones to create one large cooking zone, allowing you to optimize your cooking space. The Bridge Zones™ provide the ideal amount of space for large pots and pans.

## Auto programmes

Our auto programs help to make life in the kitchen a little easier. If you use them, you can focus on everything else that belongs to the cooking. The three auto programmes will help you to maintain the right temperature when boiling, melting and simmering.

## Easy accessible hood controls

The control for the hood is centrally placed and easily accessible while cooking. You can choose from four different power levels and set automatic or manual duct drying. There are also indications for cleaning grease filter and charcoal filter.

# BAKING

# 5-IN-1 COMBI OVEN

# 5-in-1 Combi Oven

## World's most flexible built-in Combi Oven

Are you an urban creature? Or the opposite? Do you struggle with limited space in your kitchen? Or not at all? Asko's brand new and unique 5-in-1 Combi Oven by Hafele solves a lot of problems as well as adds a lot of value to your cooking. Five different heating methods - full steam, microwaves, heat, combination heat/microwaves and combination heat/steam - in one and the same oven saves place in your kitchen for other appliances. Why not combine it with an Elements coffee machine. Or extend the cooking possibilities even more by pairing it with one of Asko's convection or Pyrolytic Self Clean™ Ovens by Hafele.

## 1. Steam

---

Gentle, pressure-free cooking of vegetables, fish and meat. Use full steam function for cooking fresh fish or inject steam in the end of baking bread to create a delicious crispy crust.

## 2. Microwave

---

A real time saver when re-heating food and warming liquids, also good for defrosting.

## 3. Conventional heat

---

Various functions for baking and cooking by combining upper and lower heat, hot air and grill.

## 4. Combination Conventional heat / microwaves

---

The dish is cooked with a combination of microwaves and hot air. This shortens the cooking time, but the dishes do get a nice brown crispy top.

## 5. Combination Conventional heat / steam

---

To combine hot air and steam brings out more taste and creates a more appealing texture of for example meat and fish. The steam is sprayed into the oven cavity at regular intervals.

# Cooking with Steam

Steam is used daily by professional chefs to bring out more flavour from the food and to create delicious crispy crusts on bread and pastries. Cooking with steam is gentle on food and preserves vitamins and nutrients better than traditional boiling. Healthy and natural, steam cooking preserves the full flavour of foods. This cooking method releases no odours and there is no need to add salt to the water or to add herbs and spices. With Asko's Combi Oven by Hafele, you can combine traditional convection with steam in a single cooking programme or simply use just hot air or steam.

## Preserves the natural flavours

Bring out new flavours by using steam in combination with hot air or cook truly healthy food using steam alone. This will preserve all the mineral salts and flavour within the food while retaining its colour and texture. Meat, fish and vegetables can be cooked simultaneously: just set the time according to the food that requires the most time to cook and there is no risk of overcooking.

## Perfect recycled food with Regenerate function

The regenerate function is used to gently reheat previously cooked dishes. The use of steam means there is no loss of quality. Taste and texture are preserved as though the dish is freshly cooked. This function is suitable for most dishes. Several dishes can be regenerated simultaneously.

## Only pure steam

Asko's 5-in-1 Combi Oven by Hafele has a unique steam generation system that creates nothing more than pure steam. This is possible thanks to the flow meter, which ensures that the correct amount of water is used, and the separator, where the pure steam and condensed water are separated. Condensed steam falls to the bottom of the oven where it is heated and becomes new steam. This ensures that your food just gets steamed and not boiled.

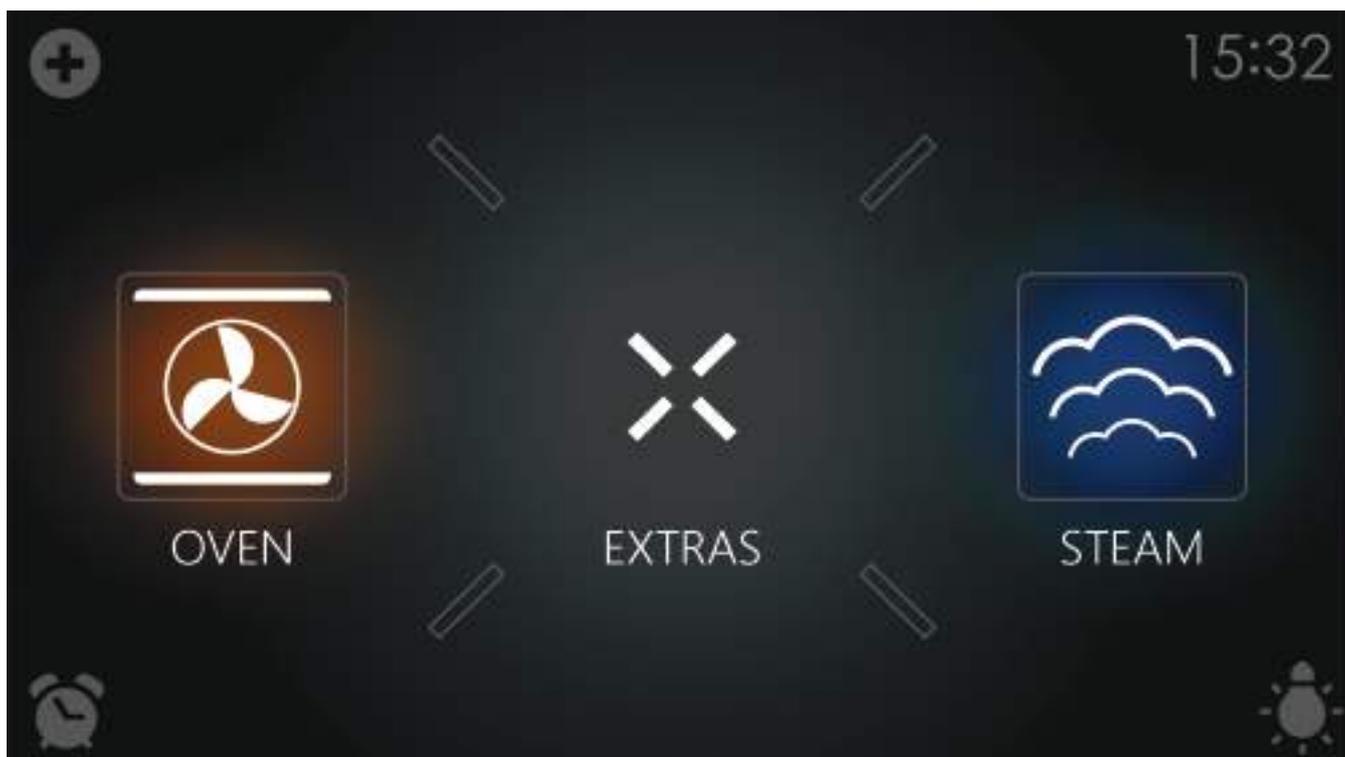

## Steam assisted cooking

With the Conventional heat / steam function, the steam is sprayed into the oven cavity at regular intervals. Using a combination of steam and convection is a good way to improve heat transfer while also browning the food. Steam makes the heating more efficient and prevents dehydration of the food, providing more succulent foods. Useful when cooking meat and chicken, for example.

# Cooking with the right touch

There are few things in life that compare to sharing a beautiful meal with the people you love. The Elements by ASKO 5-in-1 Combi Oven is packed with intelligent features that take all the guesswork out of cooking, you will be creating delicious meals from day one.

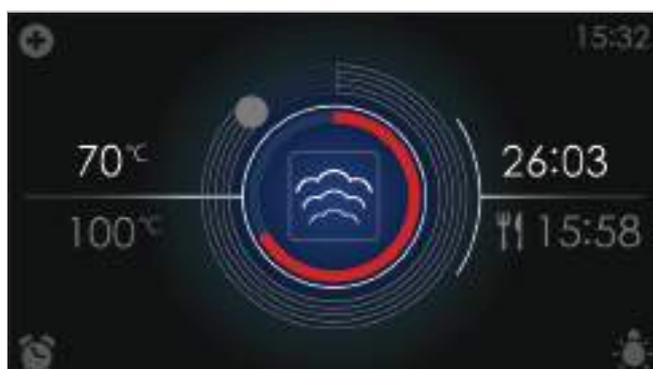

The Asko Elements Combi Oven by Hafele comes with a unique interaction philosophy based on a TFT touchscreen with the most frequently used functions immediately accessible. The interface is easy and engaging to use and will encourage you to explore all features and functions of the oven. It is the smart way to enhance your cooking.

If you need coaching in your cooking, then select any of the up to 160 auto programs in the Asko Elements Combi Oven by Hafele. You can simply select a dish from a list of pre-programmed dishes and then adjust weight and intensity if necessary.

Stage cooking allows you to combine up to three functions in one cooking process. Select different functions and settings to compose the cooking process of your preference.

The colour-coded and informative status screens provide immediate feedback in both text and graphics on current and selected temperature, duration and oven mode.

The interface is packed with useful information that encourages you to explore the full functionality of oven.

# The hub of every kitchen

There are few things in life that compare to sharing a beautiful meal with the people you love. And ASKO ovens by Hafele make it easy. Packed with intelligent features that take all the guesswork out of cooking, you will be creating restaurant quality meals from day one. Whether it's a family feast or a delicious gourmet snack, ASKO's 5-in1 Combi Oven will complement your passion for great cooking and help make every moment in the kitchen a joy.

## Inverter microwave system

In a conventional microwave oven, power is delivered in pulses. With Asko's unique Inverter Microwave system, the power is continuous. The result is even and careful heating of the food, less energy consumption, and less noise.

## Ultra cool door with soft opening and closing

The oven door is constructed for maximum safety with up to four high-quality safety glasses and three heat-reflecting layers. Together with the cooling fan they ensure that the outside of the oven door is kept at normal room temperature even if the inside temperature is 240°C. For safety and convenience, the door hinges are also fitted with integrated dampers that enable soft closing and opening.

Under-counter installation

# Vacuum Drawer

The ASKO Vacuum Drawer by Hafele provides a unique possibility to introduce advanced cooking in your home. The 14 cm high drawer is co-designed and prepared for installation together with the 5-in-1 Combi Oven. The drawer can be used for preparing food for Sous-vide cooking as well as for storing, packing or portioning food.

## Sous-vide and Vacuum Technique

The Sous-vide cooking technique involves sealing food in special vacuum bags and then cooking it in steam at temperatures between 40 and 100°C. Thanks to the completely sealed bag natural flavours, colour and texture, as well as all the essential vitamins and minerals are preserved. Food cooked in vacuum packaging also needs significantly less salt than food cooked in the traditional way.

## Push to Open

Installed right under your oven and with a convenient push-to-open mechanism, the Elements by ASKO Vacuum Drawer is very accessible. You can choose from three levels of seals for different thicknesses of plastic bags.

## Touch Control

With a user-friendly touch control interface, you can choose between three different vacuum levels depending on sensitiveness of the food. For example, meat needs a higher vacuum level of cooking effect to be optimal. Fruit however need a lower vacuum level to not be damaged by the high negative air pressure.

# COOLING

Nordic Fresh  
Range of Luxurious Refrigerators

# Inspired by Nordic

To understand how our new Nordic Fresh fridges and freezers work, we must first learn from nature. For example, different plants need different environments to grow strong. Some need sun and a dry climate, others need shade and moisture.

The same principle applies to storing fresh food in a fridge or a freezer. We have mimicked nature to create microclimates within a single fridge, offering the best possible storage conditions for different types of food.

# More taste, less waste

Smart features and state-of-the-art technology for better food and a trouble-free everyday life.

# Now you see me

## Built-in beauty

The Asko Nordic Fresh Range by Hafele is developed to fit perfectly into every kitchen where design and functionality are equally important. The built-in units make it easy to create a kitchen that matches your taste.

## Doors with exclusive feel

Enjoy the comfort of soft-closing doors on your fridge and freezer. They make less noise and ensure lesser damages on bottles and other sensitive packing.

# Make a fresh start

Over time people have come to do their grocery shopping less frequently. Food and beverages are stored in fridges and freezers longer than before, placing high demands on functionality. The Asko Nordic Fresh Range by Hafele combines a robust construction with unique features. Together they strive towards the same goal; keeping your food well for as long as possible.

# The refrigerator

## 07.12 am Tuesday.

Breakfast. Hectic. Everyone is in a hurry. How can the fridge help?  
Let us show you a few smart functionalities that we have been developed by Asko to make  
your day start well.

At breakfast time, the fridge is opened and closed repeatedly, allowing warm air to increase the temperature inside the fridge. ASKO refrigerators by Hafele automatically lower the temperature just before periods of frequent opening. This little trick keeps your food fresh up to 20 percent longer.

Automatic Humidity Control is a smart membrane that keeps the perfect humidity level for your fruits and veggies at all times. Less waste and more taste!

When the door is open, the fridge and its contents are exposed to warm air. When the door recloses the Cool Flow System makes sure that the inside-temperature is rapidly restored. Your food is preserved thanks to the continuous airflow that helps prevent it from drying out. First-day freshness for more than one day.

You know the stuff in the back of the shelf that you only find when cleaning out. Forget it. We want the food to be easily accessible, so Asko has designed the drawers of the Nordic Fresh+ fridges and freezer with smooth sliding telescopic and soft closing rails. No more forgotten leftovers.

Different types of food need different storing conditions. Let the smart Dura Fresh™ system create the perfect microclimate for your meat, fish or vegetables so that it is still at its best when you want to cook it.

It is now easier to find the right food in a freezer without ice covered walls. The ASKO No Frost function lets you make the most use of space in your freezer. The automatic defrosting system saves you money since it requires less energy to keep your food frozen. Good for you – and for the environment.

Keeping food at room temperature is devastating for its freshness. Instead of taking out the whole package of ham, salami or cheese – why not prepare the breakfast tray? It is a nice looking wooden tray, designed to fit your breakfast favourites.

# Loaded with

## Different climates for different foods

Meat, fish and shellfish need a slightly colder environment than other foods. This is why Asko created Dura Fresh™, a climate control storage system, with customized temperature settings.

Dura Fresh™ System

## Perfect moisture level

Fruit and vegetables need the perfect moisture level to last longer and retain their nutritional value.

Auto Humidity Control

## Same temperature on all shelves

The effective air distribution system keeps an even temperature throughout the fridge and freezer. No need to worry about where to put what – just place the food where you like to.

Cool Flow +

## Soft-closing comfort

Soft-closing drawers are luxury and ergonomical at the same time. Just give the drawer a light push and it closes silently.

Soft Closing Drawers

# smartness

## Preserve on wood

In Nordic countries wood is a common material used for many purposes. Therefore, it is logical that Asko's Nordic Fresh Exclusive Line of Refrigerators by Hafele are fitted with beautiful wooden accessories.

Wooden Accessories

## No frost is the best frost

No frost in the freezer means that there is more room to store food. A frost-free freezer also saves energy. And think about the time and effort you save by not having to defrost.

Freeze without frost

## Keeping cool always

Each time the fridge door is opened, the warm air triggers a natural degradation process in the food. The smart Adaptive Temperature Control prevents this by lowering the temperature before periods of frequent opening.

Adaptive Temperature Control

## Speedy freezing

It is important to get food into the freezer as soon as possible after shopping to avoid degradation. The fast freezing function identifies unfrozen food in the cabinet and starts an immediate intensive freezing cycle.

Auto Fast Freeze

# Keep the fresh fresh

When food is exposed to external conditions, it starts to decay and gradually loses its nutritional value. The Dura Fresh™ System allows you to create the perfect microclimate for your food so that it keeps fresh for a longer time.

# Dura Fresh™ System

## Temperature Control

Set the right temperature for every type of food. The temperature range for the upper Dry Drawer is -2°C to +5°C and for the Humid Drawers 0°C to +7°C.

---

## Auto Humidity Control

Fully automated moisture control based on a special membrane which releases humid air when the moisture level exceeds 90%. Below 90% the membrane closes and traps the moisture inside the Humid Drawers.

---

## Dry Drawer

Use the Dry Drawer to store fish, meat, shellfish and dairy products. This is the coldest place in the fridge – and the driest.

---

## Humid Drawers

This is the place for fruit and vegetables which require higher humidity to stay fresh. The Humid Drawers are approximately 2°C warmer than the Dry Drawer.

---

# Cool Flow™ System

These exclusive Asko Refrigerators by Hafele come with two separate flows of cool air – one for the Dura Fresh™ drawers and one for the remaining compartment. We call it Cool Flow+

Fast and even distribution of cool air is crucial for keeping your food fresh. The Cool Flow system allows for storing all types of food on any shelf by ensuring that the temperature is rapidly restored after the door has been opened. The continuous air flow prevents the food from drying out and helps preserve its first-day freshness.

# Adaptive Temperature Control

Smart sensors closely monitor the way you open the fridge. They adjust the cooling effect accordingly by lowering the temperature automatically prior to periods of frequent use. Hereby, the temperature is kept at a more even level which makes the food stay fresh for longer and keeps the waste to a minimum.

# Auto Super Cool™

With Auto Super Cool™ the pre-set temperature level is reached faster than normal. The Auto Super Cool™ kicks in when there is a major temperature peak.

# Plain luxury

Spending time at the weekend breakfast table is nice although it is damaging to your food. Why not prepare the nicely crafted wooden tray with smaller portions of your favourite breakfast toppings? Ready to serve whenever you are.

# Wooden accessories

## Wooden bottle tray

Keep your glass bottles safe and avoid unpleasant sounds when loading and unloading them when using the beautiful wooden bottle tray.

## Wooden egg tray

This is a perfect match of two natural materials. One for storing and one for eating. The wooden egg tray carefully stores your eggs while it adds beauty to the inside of your Nordic Fresh refrigerator.

## Multi box

Helps you protect other food in your fridge from strong-smelling ingredients. The Multi Box can be used for cheese, among other things.

# Keep your fridge full

Touch Control Interface	1
Cool Flow + Efficient distribution of air	2
Wooden Bottle holder & Wooden Multibox	3
Wooden Breakfast Tray	4
Five LED Soft Lights	5
Dura Fresh™ Control	6
Dura Fresh™ Dry Drawer	7
Dura Fresh™ Humid Drawer	8
Automatic Humidity Control	9
Door-on-door with Soft Close	10

# Freeze without frost

## No frost is the best frost

With Asko's effective No Frost function, defrosting is in the past. In general, the food is easier to handle as packaging doesn't stick together and it is simpler to see what is in the packaging. With No Frost, the freezer's entire space is available for storing which makes it more energy efficient. You save both money and the environment.

# Auto Fast Freeze

At a fast freezing process ice crystals are smaller compared to a slow freezing process. Since small ice crystals do not affect the fibres in food like meat or vegetables, the food is kept in its original condition.

The Auto Super Freeze function in Asko Refrigerators by Hafele, helps retain the healthy nutrients in your food. The Auto Fast Freeze function detects warm and unfrozen food in the freezer and triggers an intense blow of cold air that freezes the food fast. And, when you defrost the food there is no weight loss since no water has been added to your food. It is like time stood still.

# Soft Closing Drawers

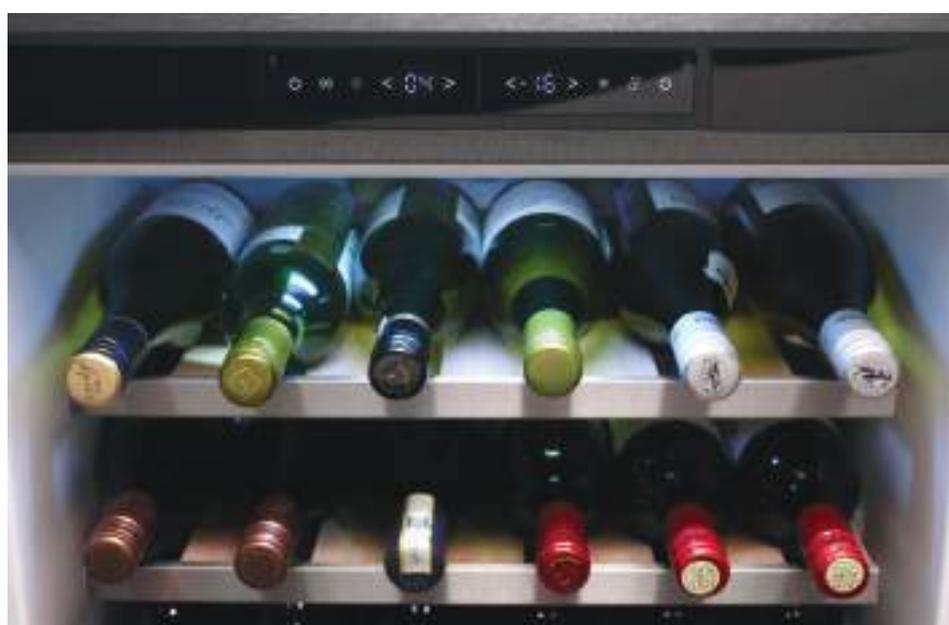

We think that food that you use often should be easily accessible. That's why the drawers in the Nordic Fresh Freezers are designed with smoothly sliding telescopic rails and a soft-closing function.

# A wine cellar in the kitchen

## Wine Centre

The Asko Refrigerators from the Black Steel Series by Hafele can be installed in a built-in or a freestanding application and can be combined with the special Wine Centre Kit that unites the wine chiller and the fridge or freezer. It adds a signature to your kitchen.

# Always the right temperature

If you have ever found that your favourite wine does not taste as good as you remember from the last time, it more often depends on storage than any fault during the actual winemaking. An important factor for maintaining and developing the wine's flavours is temperature. With the Asko wine coolers you can set exactly the right temperature for the type and character of wine you want to preserve.

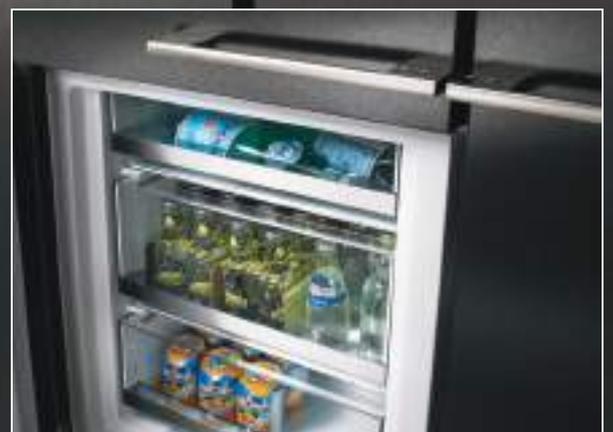

Do you think wine should deserve the same care as your food? Well, we think so. That's why Asko has created an unbeatable combination: a wine chiller with a convertible freezer that you can combine with a refrigerator.

## Convertible convenience

The freezer compartment has a separate temperature control enabling you to convert it into a fridge. This is the perfect feature when you temporarily have to store more food for a dinner party or when you need extra space for storing bulky food.

Type of display	Touch control
Separate temperature controls for fresh drawers	Yes
Separate temperature controls for cooling and freezer compartments	Yes

### Use and flexibility

Convertible compartment	No
LED lights / Locations	5 LED strips / Fridge and Dura Fresh compartments
Adjustable shelves / Removable shelves (fridge compartment)	Yes / Yes
Soft Closing door / Soft closing drawers / Soft closing wine rack	Yes / Yes / No
Door open alarm / High temp alarm	Yes / Yes

### Dimensions

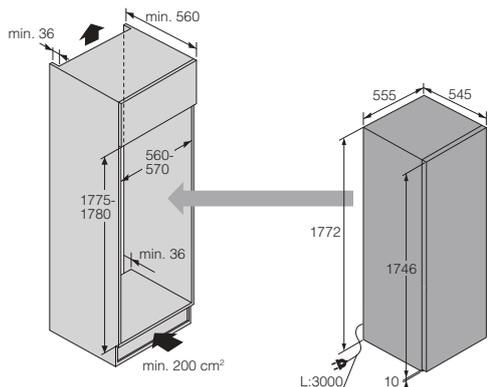

Appliance dimensions (H / W / D)	1772 / 555 / 545 mm
Niche dimensions (H / W / D)	1775-1780 / 560-570 / 560 mm
Length electrical cord	2000 mm

### Technical data

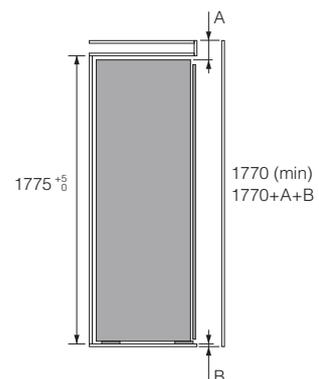

Electrical connection	85 W / 220-240 V / 50 Hz / 1-phase x 10 A
Energy rating (EU)	A++

### Included accessories

Wooden breakfast tray, Wooden bottle holder, Multi box with wooden lid

Appliance and built-in dimensions

Custom door dimensions

# RFN31842I

Article Number: 538.10.360

White

Built-in fridge / freezer, 178 cm

## Key features

Energy class A++, No Frost, Dura Fresh zone, Auto Humidity Control, Soft Close door, Wooden breakfast tray, Cool Flow+, Adaptive Temperature Control

## Design and integration

Total volume / Fridge volume / Freezer volume	268 / 182 / 86 litre
Shelves / Door shelves / Drawers in fridge / Compartments in freezer	3 / 4 / 2 / 3
Door-to-door / Sliding Door	Yes / No
Weight	-
Max weight of custom door	20 kg

## Cooling and preservation systems

No Frost	Yes
Fresh drawers	1 Meat / fish + 1 Fruit / vegetables
Fast Freeze	Yes
Fast Cooling	Yes
Air distribution system	Cool Flow+
Adaptive Temperature Control / Auto humidity control	Yes / Yes

## Display and control

Type of display	Touch control
Separate temperature controls for fresh drawers	Yes
Separate temperature controls for cooling and freezer compartments	Yes

## Use and flexibility

Convertible compartment	No
LED lights / Locations	3 LED Strips / Fridge, Dura Fresh and Freezer
Adjustable shelves / Removable shelves (fridge compartment)	Yes / Yes
Soft Closing door / Soft closing drawers / Soft closing wine rack	Yes / Yes / No
Door open alarm / High temp alarm	Yes / Yes

### Note!

If the specified dimensions for the ventilation opening is not followed, the compressor runs more often which in turn leads not only to increased energy consumption but also to damaged compressor.

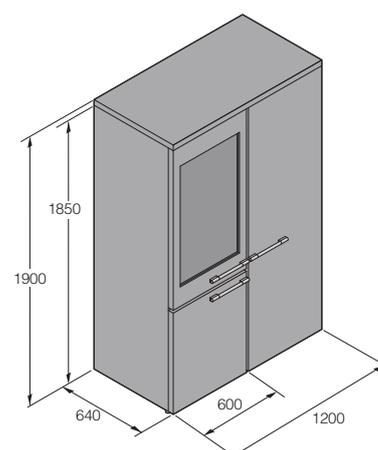

Remember to always follow the measurements for required ventilation opening!

# COOKERHOODS

# The Air Factory

A future that began  
long ago.

Falmec was born in 1981 as a small artisanal business and has grown today to be one of Italy's centres of excellence and a leading international player in the market.

An "air factory" with a state-of-the-art approach, an experience in the design and manufacture of extraction solutions, developed through years of experience. A team, a family, bringing together the experience and skill of different generations, contributing with their energy, creativity and talent to create products and solutions that improve people's daily lives.

A product created through  
genuine Italian quality and  
culture.

A completely integrated production organization, from initial design up to the finished product. Falmec's multi-phase process takes place entirely on site at its company headquarters in Vittorio Veneto, just outside Venice. Each Falmec hood is developed, designed and built entirely in Vittorio Veneto, a town located in one of the most important Italian production districts, where a true industrial, steel-specialized culture blends with the ingenuity and craftsmanship skills rooted in this territory. The true value of "Made in Italy" is embodied in a real product culture: an absolute guarantee of quality that is found in every product and that starts from design, through the care of detail and the perfection in the making, to end with the choice of the finest materials.

# SPAZIO

- Black-painted steel chassis
- Circle.Tech technology with Carbon.Zeo filters
- Smoked glass shelves
- LED lighting
- Removable and washable metallic grease filter
- Equipped with power outlets and USB ports
- Ladle hanger, spices shelf, tablet holder and indoor plants growing area included
- Remote control included
- Dialogue System-ready

## VERSO

- Tempered black glass
- Touch control + 24h function
- LED lighting
- Double suction area (frontal and lower)
- Frontal opening
- Metallic grease filter, removable and washable
- Optional combined regenerable Carbon. Zeo filter
- Charcoal filter included
- Rear outlet available
- Optional chimney

# LUMINA NRS<sup>®</sup>

- Scotch brite stainless steel (AISI 304)
- NRS<sup>®</sup> technology for a quieter kitchen
- Perimeter suction
- Metallic grease filter, removable and washable
- Touch control
- 24hr timer function
- White neon ambient light
- Tempered glass with black finishing

# ALBA

- Glass perimeter frame
- Matte white customizable panel
- LED perimeter lighting
- Removable and washable metallic filter
- Electronic button board
- Remote control included
- Perimeter extraction
- Dialogue System-ready
