

SLIDING

SLIDING WALL

Introduction

Dear Customers,

Hafele has pioneered the way fittings are sold in India for many years now. Being a German company, our foremost concern has always been to offer our customers, premium quality products at competitive prices paired with solution based services. On the parallel, our focus has also remained to provide optimum functionality, enabling our customers to enjoy the benefits of effective utilization of space within and around their living, working or recreational environments. As a result of this, Hafele brings to you the advantage of 'space-efficiency' with its range of Movable Wall Systems from Netherlands that bring enormous versatility and design in dividing or uniting spaces in a given area.

Our Movable Wall Systems are backed by decades of experience and leadership in manufacturing proficiency and have the technological edge to expand to any possible imagination of designers. This applies specifically to the development of flexible space-saving solutions for hotels, congress or convention centres, schools, restaurants, shopping centres along with commercial and residential spaces. Our greatest strength remains to deliver customization in applications supported by standardization in quality and functionality.

Through this catalogue we bring to you two diverse categories for different movable partition options which can be realized in various applications. The Palace series with three models – Palace 80, 90 and 110, gives you the possibility of installing MDF partitions that are extremely easy to operate, ensure excellent sound insulation and can withstand extreme temperature fluctuations. An off-

shoot of the Palace series is the Transpalace system that allows you to install framed glass partitions - retaining the inherent benefits while also ensuring complete transparency within the room.

The President series offers you the possibility of installing seamless movable glass walls largely required in spaces like shops, cafes and restaurants, for instance. The biggest advantage of this series is that while it allows you to enclose private spaces within an area, its virtue of transparency retains the design and aesthetics of the room. All the Movable Wall Systems from Hafele come with efficient acoustic sealing to rule out the infiltration of any external noise.

We, at Hafele, offer optimal support to see the start of every project to its end - our team is at your service not only during the design and construction process but are also available to assist you for every technical and installation consultation.

So please enjoy this handy guide to quality space-saving ideas and solutions and get in touch with us with your requirements.

Jürgen Wolf
Managing Director
(Hafele South Asia)

Hafele

Reassuring Expertise

"For over 9 decades, we've been helping people make more of their homes.

Established in Germany, and now operating worldwide, we specialise in the fittings, hardware and systems that improve the way your home, works. So when you choose our products as part of your new or reformed home, you know you're getting the benefit of extensive knowledge and decades of experience.

And we're still a family business, owned and managed by family members who really care about the products

and service we provide. You can rely on our commitment to the highest standards of quality and reliability, founded on a long tradition of German engineering where attention to detail is second nature.

All our home improvement ideas are built to last – day in, day out – we want you to get the very best from every corner of your home, for many years to come."

Hafele

Worldwide

With its origin in 1923 in a small town named 'Nagold' from the Swabian region of Germany that nurses a passion for hardware technology, it is no surprise that Häfele has lived up to its roots through a successful presence in the architectural and furniture hardware industry for over 9 decades now. Today, Häfele's worldwide penetration includes 38 subsidiaries across Europe, America, Asia, Australia and New Zealand. With these subsidiaries and numerous other sales organisations, Häfele operates in over 150 countries. The Häfele headquarters, 4 manufacturing units and 10 sales offices are located within Germany; while 1 manufacturing unit is located at Budapest, Hungary. The company also owns one of the largest and most sophisticated warehouses in its home country. The Häfele worldwide workforce is empowered by a base of over 7600 employees.

The group services over 150,000 customers across the globe through its extensive range of hardware products and a comprehensive logistics system. In addition to this, Häfele also provides consultative services to its customers, educating and advising them about buying the correct hardware as per their requirements. With this level of market penetration and ability to handle worldwide demand, it comes as no surprise that the company is an authority in the segment of home interior solutions; what is pleasantly surprising, though, is that in spite of its size, Häfele still remains a family owned and run business with a unique, friendly and value-centric work culture which is strongly followed among all its subsidiaries.

Häfele India

Häfele India is a wholly-owned subsidiary of the Häfele Global network and has been operating in India since 2003 under the leadership of Mr. Jürgen Wolf (Managing Director). The ability of the company to understand the diverse Indian market has made it an authority in the field of architectural hardware, furniture and kitchen fittings and accessories. The company also has a strong presence in synergized product categories namely Appliances, Lights, Sanitary and Surfaces catering to the focused demand from these industries.

The subsidiary has a strong nation-wide presence with offices in Mumbai, Pune, Ahmedabad, Bangalore, Chennai, Hyderabad, Delhi and Kolkata. It has full-scale operations in Sri Lanka and Bangladesh with Regional offices and Design Showrooms in both the countries; and has also spread its sales operations to other countries in South Asia including Nepal and Bhutan.

Häfele's design showrooms are hubs of international home interior trends and cutting edge designs presented in a world-class environment, where customers can see home solutions in their inherent applications. These showrooms function as a one-stop-shop for all home interior and improvement needs - from providing in-depth technical advice to kitchen and wardrobe designing services through a team of experts stationed at the showroom.

Häfele India services its customers with a base of over 850 employees, a well-networked Franchise base of over 80 shops along with over 1000 dealers situated across South Asia. The subsidiary has a sophisticated Logistics centre in Mumbai along with distribution centres in Delhi, Bangalore, Kolkata and Colombo respectively.

360° Project Services

Globally, Häfele has created a strong international position as a “360 Degree Project Management Partner” with independent International Project Sales Offices deployed in the U.S. (North America), Germany (Europe) and Singapore (Asia). These Sales set-ups are constantly in touch with renowned Architects, Designers and Project Consultants from across the world and have the technical competencies to handle major International projects.

We offer complete services to these projects from accurate product specifications and efficient sales to adept installation guidance and support. This allows us to walk the length of the entire project duration by aiding and supporting our customers at every stage.

This global technical competency along with an in-depth understanding of international market trends forms the basis of our holistic service approach in South Asia. We can execute the most abstract solutions in any interior space by integrating functionality with cutting-edge designs; and this proposition is ably backed by our unified service network to ensure continued support

All you need to know about movable walls

Movable walls allow business owners and homeowners to create the floor plan they need out of a wide-open space. Movable walls are partitions that can increase the functionality of an open area such as a loft apartment, warehouse, conference room or banquet hall. These systems can provide privacy and good acoustic insulation for work and living environments.

Uses:

Movable wall panels are an ideal way to separate areas and create privacy in a room.

- Homeowners can select wall panels that create a solid wall and door for entry into a bedroom or living area or use glass panels to define separate areas of the living space while keeping the open floor concept in the room.
- In a business environment, movable walls are a quick way to set up offices and change the layout of the building space to accommodate new workers.

- Hotels and Malls can use movable walls to create more number of functional areas within the available space – for instance, a banquet hall or a convention centre in a Hotel can double up with a movable wall partition to accommodate two functions or conferences simultaneously.

Movable Wall Systems by Hafele:

Hafele brings to you its range of Movable Wall systems from Parthos, Netherlands. These systems are ideal for uniting or dividing spaces within a given area to achieve optimal space utility. Our range of movable wall systems gives you the flexibility of customization and conforms to the highest standards of functionality and quality.

Our products help to expand the imagination of designers. This applies especially to the development of flexible space-saving solutions for hotels, congress and convention centres, schools, restaurants, shopping centres, commercial buildings or large apartments.

Our greatest strength is our ability to deliver custom work.

Going the extra-mile; End-to-end solutions by Hafele:

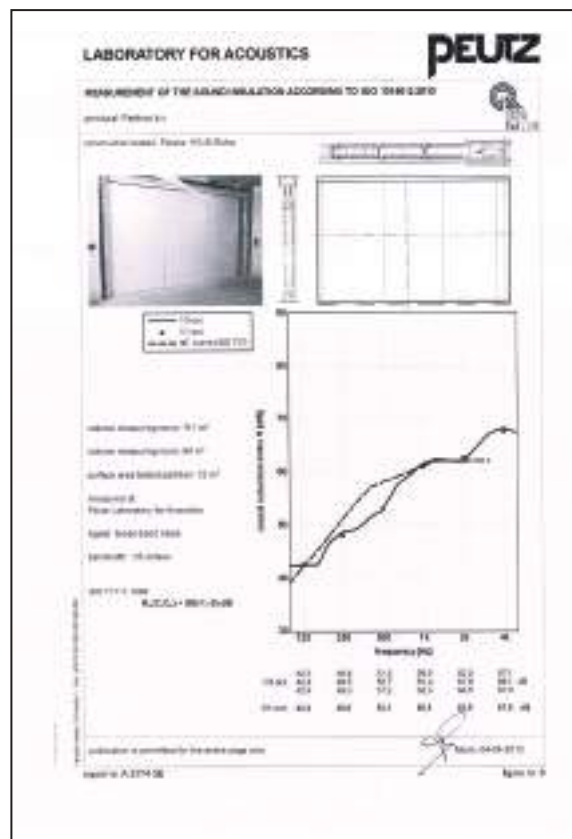

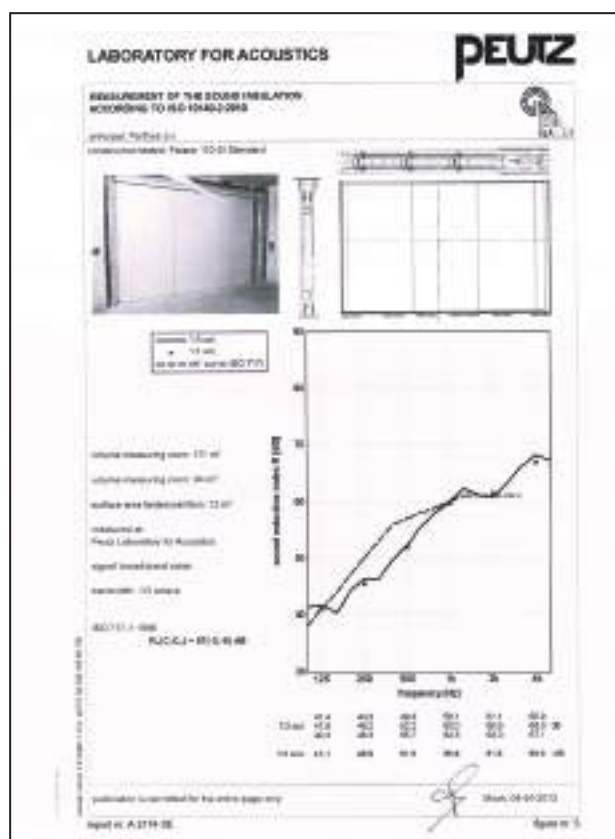

While Hafele stands for excellence in quality and functionality, it is also recognized as your partner for end-to-end solutions.

- Our team of experts handhold you from the very start of a project with proficient advice and consultation in designing and planning
- We are available to see the maturity of the project with technical assistance in installation.

- Our assistance does not end here; we have a dedicated customer service helpline to assist you with any product operational issues and our service is only a phone call away.

We believe in giving you every possible convenience right from the time you approach us and through the very duration that you use our product functionalities!

Palace

A flexible solution for every space

Our products help to expand the imagination of designers. This applies especially to the development of flexible space-saving solutions for hotels, congress and convention centres, schools, restaurants, shopping centres and commercial buildings. Our greatest strength is our ability to deliver custom work. The Palace series, especially, is proof of this: a durable movable wall that is extremely easy to operate. In addition to our standard models Palace 80, 90 and 110 we offer many other possibilities, all of them functional and fire-resistant, if required. The design can be tailored seamlessly to your project.

For instance, if you wish to divide a room without any loss of sound insulation and transparency, our latest model Transpalace may offer the best solution.

Every square metre of your area to be divided can be used as efficiently as possible. We offer durable and quickly realisable solutions for every work or meeting place. Of course, we also offer optimal support; not only during the design and construction process, but afterwards as well.

From tiny offices to huge conference halls: our stylish, functional Palace movable walls can give every space a new dimension.

In no time at all, Palace will enable you to divide a large space into smaller units. Thanks to our extensive experience with bearing technology and the rolling properties of a variety of different materials, we can find a high-quality, durable rail and trolley construction for every application that will also ensure an optimal ease of operation. (Floor guidance mechanisms will not be an obstruction to your floor.)

Stability as well as perfect sound insulation are two typifying characteristics of Palace walls. The spindle mechanism and the so-called acoustic pressure sleeves secure the different panels firmly between the floor and the track. In addition, the parking possibilities are virtually unlimited.

Palace 80

For many types of users, the Palace 80 may very well be the ultimate solution for creating more space and flexibility.

This movable wall with a panel thickness of only 80 mm will guarantee an optimal ease of operation with only the slightest loss of space. The favourable cost aspect also makes it an excellent alternative. Furthermore, the Palace 80 proves that a slim construction does not affect the stability and sound insulation.

The trolleys of this wall are suspended on metal bearers running horizontally through the panel. The result is a self supporting structure.

- Standard version with covering profiles
- Very easy to operate due to light construction
- High-quality track and trolley system
- Stable and self-supporting frame construction
- Enormous flexibility thanks to a broad range of panels

Palace 90

The Palace 90 is a paradigm of robust custom work. In spite of its slim look, the Palace 90 disposes of an extensive package of functional characteristics. Furthermore, this type of wall is suited to every (working) environment. The inlaid aluminium border profiles give it an especially stylish look.

- New EPDM pressure sleeve and pieces for improved acoustic properties
- Standard version with inlaid profiles
- Stable and self-supporting frame construction
- Enormous flexibility thanks to a broad range of panel models
- Attractively priced
- Very easy to operate
- High-quality track and trolley system

Palace 110 S

The Palace 110 makes it much easier to organise your space: a high degree of sound insulation, single or double doors, height of more than fifteen metres, curved panels if required, semi-automatic operation and fire resistance rating of up to sixty minutes!

- Durable and stable metal construction
- Possible heights of more than 15 metres
- Optimal flexibility, curved walls and tracks possible
- Available in a fire-resistant model of up to 30 and 60 minutes with passdoor
- Available in a broad range of finishes
- High-quality track and trolley system
- L-shaped semi-automatically operated top & bottom seals possible

Design

Efficiency and safety, as well as aesthetics and stability: That is what the Palace 110 stands for. This robustly executed movable wall satisfies even the toughest requirements.

The Palace 110 proves that quality and design can be perfectly integrated. This wall can be adapted to suit every interior design. There are countless possibilities as to shape, material, colour, finished edges, corner elements and glass openings. Even curved walls and tracks can be delivered.

The Palace 110 is perfectly suited to create silence, with panels measuring only 110 mm in thickness. Even when this concerns heights of more than 15 meters. Custom solutions are our specialty. In consultation with Hafele, you can determine the parking positions and the lay-out of the track, tailored to your personal requirements.

For those who require a product that is extremely easy to operate, our semi-automatically operated movable walls may be the very best solution. Hafele aims to deliver products that are completely tailored to your needs.

Transpalace

The most exclusive model in the Palace series is the Transpalace. This sturdy, transparent movable wall has been finished with double-layer safety glass. Transpalace will allow you to retain the transparency, while enjoying what the other Palace walls have to offer, such as a high degree of sound insulation, a stable frame and a beautiful design. The technology has been subtly incorporated behind a thin panel of glass, in the colour of your choice.

- Glass can be replaced separately
- Aluminium profiles, available in every RAL colour chart system
- Slim glass available in every colour
- Welded aluminium/steel construction

President

Clear options for every space

Movable glass walls offer a variety of applications: in shops, hotels, cafes and restaurants and government, banking and insurance buildings, for instance. The President series makes it easy for you to create privacy, while its transparency and open look and feel will allow the space itself to remain intact. Thanks to its slim construction, this functional and stable wall will take up only a remarkably small amount of space in a parked position.

From shopping-arcade to reception area: the President is stylish and will let in plenty of light. For additional privacy, the glass can be etched, sandblasted or decorated with foil.

Your company logo, texts and entire designs can also be added. Because we develop and produce the President series completely under its own management, there is practically no limit when it comes to turning creative ideas in to practical solutions.

A selection can be made, for instance, between straight and curved, as well as segmented panels. Let your imagination run free and discover, with the help of our consultants, which movable glass wall will be shown to its best advantage in your project!

Advantages of a well engineered design

Perfection to even the tiniest details: that's one of our typifying characteristics. From raw materials and a perfectly monitored production process to finished products of the finest quality. Our standard options include an extensive choice of glass types and finishes. Regardless of whether your interior is dominated by light or dark colours: the aluminium parts of our President series are available in

nearly every colour imaginable. An important detail: the glass panels of the President series have been developed so that vertical aluminium profiles will not be necessary. So no matter where your wall is to be installed, you can always choose an unbroken design without the obstruction of unnecessary frames. Clarity and transparency are among our highest priorities.

President

An enormous degree of user-friendliness and an extensive range of options as to design and finish are among the President's greatest advantages. In addition to design, we also pay a great deal of attention to user-friendliness.

- Completely transparent partition
- Curved segmented models available
- Virtually unlimited choice of options in pattern and design
- High-quality track and trolley system
- Extremely durable clamping construction without necessity of drilling the glass
- Profiles and track available in several colours

Fire Resistance

Hafele continually improves its products and invests heavily in product development. As a result of this, we are always aspiring to the needs and desires of our customers and developing new solutions for them. Keeping this in mind, we partner with only such brands who lay great emphasis on quality and innovation.

Our SLIDO Walls partner, Parthos pays close attention to the European directives concerning fire safety of building products. Fire resistance of movable walls depends on the behaviour of the wall construction when subjected to fire.

Specifically spread of flame and thermal insulation are important criteria. Various tests (in accordance with EN 1364) with renowned Institutes have proved that Parthos is able to produce a movable wall, with integrated pass door, with a 30 minutes fire resistance. A reputation is established!

So when fire resistance is a must, you have the choice of the Parthos Palace supplied in EI30 or even EI60 classification.

Sound Insulation

The sound insulation of a movable wall is defined by International Standard Laboratory measurements in accordance with ISO 140-3.

In building practice however, there will never be an ideal laboratory situation. The sound insulation between two rooms will always be affected by the surrounding construction. Generally the sound insulation will deviate approximately 5 to 10 dB from the laboratory measurement. Sound waves will pass through and under flooring (carpet), through walls and windows, above suspended ceilings and through ventilation ducts. These aspects must all be taken into account when selecting the appropriate wall system and the required demands of the rest of the building. Adding integrated pass door(s) also affects the sound insulation. This, in combination with proper operation and maintenance of the wall, will define whether the desired sound insulation is achieved or not.

We will help you with pleasure! Through our long experience we can advise you at the design stage in order to improve the acoustics of your room.

Palace 80/90

Movable walls Parthos-Netherlands type Palace 80 Elements thickness 80mm.

Track Type 2C/2RC

Material Aluminium Extrusion-6005A F27 T6

Trolley Type FG2/CG2

Galvanized Steel Cold JIS STKM12,

Free Maintenance Trolley with self Lubricating multiple ball bearings

Retractable Sound Seal black Anodized Aluminium Extrusion-6063
T5 with EDPM Rubber

Frame of Zinc coated Steel tube(Cold JIS STKM12)

Aluminium Anodized profiles Extrusion-6063 T5,with edge protecting

Acoustic Material:

-Rockwool: 45kg/M3 for sound insulation,hot and cold transmission

Tight closure between the panels by EPDM Rubber

Galvanized spindle mechanic for the Retractable sound seals
Pressure force of 1500 newton

MDF/HMR boards 8/9mm

Retractable Sound Seal; black Anodized Aluminium
Extrusion-6063 T5 with EDPM Rubber

Palace 110 S

Movable walls Parthos-Netherlands type Palace 110S Elements thickness 110mm.

Track Type 2C/2RC/3.5/9
Material Aluminium Extrusion-6005A F27 T6

Trolley Type FG2/CG2/CG3/FG4
Galvanized Steel Cold JIS STKM12,
Free Maintenance Trolley with self Lubricating multiple ball bearings

Retractable Sound Seal black Anodized Aluminium Extrusion-6063 T5
with EDPM Rubber

Frame of Zinc coated Steel tube(Cold JIS STKM12)

Aluminium Anodized profiles Extrusion-6063 T5,with edge protecting

Acoustic Material:
-Rockwool: 45kg/M3 for sound insulation,hot and cold transmission
-Damping sheet for higher dB Rating (53/56/57/58dB)

Tight closure between the panels
by EPDM Rubber and magnetic seals, contact pressure of 55
newton / meter

Galvanized spindle mechanic for the Retractable sound seals
Pressure force of 1500 newton

MDF/HMR boards 16 /18 mm: free swinging suspended and
acoustically separated from the steel frame by EDPM press seals
in case of surface damage, the face boards can be replace
without removing the frame from the track

Retractable Sound Seal; black Anodized Aluminium Extrusion-6063
T5 with EDPM Rubber
